---

### **Job Summary:**

Perform design, programming, testing, and documentation duties for product customizations requested by customers for InfoLease, IDS's mission-critical portfolio management software for the equipment finance industry. InfoLease is written in the UniBASIC programming language on the UniData database platform.

### **Essential Duties and Responsibilities:**

- Product Enhancements
  - Create project estimates and designs for product enhancement requests.
  - Create programming specifications and test plans.
  - Perform programming and testing assignments for product enhancements
  - Communicate with customers and IDS team members regarding the status of enhancements.
  - Participate in release planning discussions with customers to ensure product enhancement and delivery needs are aligned with customer requirements.
  - Document product enhancement changes including implementation instructions to be included in product release notes.
  - Utilize issue tracking system(s) to record all communication and actions.
  - Develop knowledge of the lease/loan finance industry.
  - Document standards and repeatable procedures to facilitate knowledge transfer to others.
  - May require occasional travel to client sites or other IDS offices, including international travel.
- Additional Responsibilities:
  - Organize, prioritize, and handle multiple tasks/assignments/projects.
  - Participate in and lead special projects.
  - Perform other duties as assigned.

**Qualifications:**

- 2 to 5 years product development and/or support experience.
- Bachelor's degree from a four-year college or university in ECE or CS, or equivalent experience preferred.
- Preferred knowledge of the BASIC or UniBASIC programming language.
- Preferred knowledge of UniData database or similar database (PICK or UniVerse) databases.
- Familiarity with operating systems including Windows (2003 Server, XP) and UNIX (AIX, HP-UX, Sun, Linux).
- Experience with technologies such as WebLogic and WebSphere a plus.
- Intermediate knowledge of best practices in software support and customer service.
- Demonstrated communication, customer service, analytical, and problem solving skills.
- Ability to multi-task and pay strong attention to details.
- Ability to function in a high pressure and demanding environment.
- Ability to perform duties independently with general supervision.
- Must be able to pass a background check

Candidate must be able to pass criminal and credit background check.

As an Equal Opportunity Employer, we are committed to a diverse workforce.
