

## **CreditLine® Plus From International Decision Systems, Inc. Announce Upgrade to their iSeries Server**

MINNEAPOLIS, Minn. (August 11, 2006) – **International Decision Systems, Inc.** announces in line with their policy of progressive system improvements, that they recently upgraded their production CreditLine Plus® software iSeries server. The server which is based at the International Decision Systems® Basingstoke computer centre is used by motor manufacturers and their finance partners to provide wholesale floor stocking for their dealer networks.

The new server has five times the processing capacity of the original machine and has improved key transaction response times on average by a factor of three. As well as additional capacity the new machine is fully up to date with the latest IBM microcode and operating system, ensuring maximum availability and security of customer systems.

International Decision Systems, who are an accredited BACS Bureau (graded as Excellent at last BACS Inspection), have also introduced a new Disaster Recovery BACTEL-IP service, guaranteeing continued availability from their business continuity facilities at located nearby at Theale.

### **About CreditLine Plus**

CreditLine Plus has been designed for the administration of a wide range of dealer and supplier credit functions. It allows credit managers to view exposure and control risk in a secure environment that can be easily audited. Over 2,000 dealers access CreditLine products, clearly establishing International Decision Systems as a leading provider of software systems supporting dealer stock and inventory financing.
