

## **Newest Version of LeaseEnterprise® From International Decision Systems, Inc. Now Available for Immediate Download**

**MINNEAPOLIS, Minn.** (2006) – [International Decision Systems, Inc.](#) announces Version 5.6 of their *LeaseEnterprise*® software has been released and is now available for download by current users . It will also serve as the base system for new *LeaseEnterprise* clients. This release contains a number of updates aimed at advancing the product to better meet customer and market needs.

“We are very excited by the market acceptance of LeaseEnterprise” said Katie Emmel Director of Product Management at International Decision Systems®, “Small and mid-size lessors find the ease of setup, use and maintenance of *LeaseEnterprise* to be a big advantage, as they don’t need to add a technical support staff to manage the product.”

This release brings many anticipated enhancements to the product that add to its value in a finance organization. Functional highlights of the release include:

- Integration with our *Rapport*® origination software, allowing automated contract booking directly to *LeaseEnterprise* from this powerful front-end system.
- Refund security deposits in full or in a stepped manner prior to the end of the lease through the new security deposit restructure capability.
- Coupon Book generation allows you to produce coupon books yourself rather than relying upon costly third-party vendors
- Enhanced discounting (module) options allow you to retain a residual position in a deal in which you sell the stream of payments. This residual position gives you new end-of-lease control with these leases, including the ability to put the lease into renewal.
- A continually updated Data Dictionary explains *LeaseEnterprise*’s data structures in plain English, serving as an invaluable reference when writing reports using third-party tools.

- MORE -

“Many of our current *LeaseEnterprise* customers are considering adding *Rapport* to their operations to streamline their origination process” advised Dave Antila, Product Manager for *LeaseEnterprise*. “This release tightens the integration making it easier to exchange data between the two systems.”

Customers who are currently on Version 5.4 or lower of *LeaseEnterprise* are encouraged to upgrade by December 1, 2006. They can download this upgrade through a secure login from the International Decision Systems® support website at [www.idsgroup.com/services/client\\_support.htm](http://www.idsgroup.com/services/client_support.htm) or they can request to receive the update via CD.

### **About *LeaseEnterprise***

*LeaseEnterprise* is designed to handle lease accounting for companies with smaller portfolios and limited staff, is quickly being adopted by organizations big and small as it is easy to set up and simple to use. *LeaseEnterprise* is the industry's most intuitive and robust tool for automating lease management without intensive training or technical support. When combined with *Rapport* software it creates a seamless end-to-end solution enabling you to maximize your operational ROA via streamlined business processes, improved productivity, and better information access. See for yourself how easy *LeaseEnterprise* is to use by downloading a full-featured 15 day [demonstration copy](#) from our website at [http://www.idsgroup.com/products/demos/LeaseEnterprise\\_Demo.htm](http://www.idsgroup.com/products/demos/LeaseEnterprise_Demo.htm).

### **About *Rapport* Software from International Decision Systems**

Since its 2002 introduction, *Rapport* has been selected by more than 35 prominent equipment finance companies driving toward maximum efficiency in lease and loan origination. The built-in *Rapport Rules*™ engine makes this software solution powerfully adaptable for companies focused on business transformation through streamlined operations. Easily linked to any portfolio management system, including *LeaseEnterprise*, InfoLease®, or ProFinia™, *Rapport* enables extensive real-time information access across the organization, including controlled visibility for dealers, vendors, and other partners.

- MORE -

International Decision Systems delivers *Rapport* with the essential screens, workflow, business rules, and web service connections for credit evaluation. These pre-configured tools promote rapid adoption and beneficial use of the system, and serve as an excellent base for further developing a fully configured, company-specific solution meeting a wide range of business objectives.
