# FleetWare Terminations

The FleetWare Terminations module accommodates all the trading activities following the return of a vehicle by the customer through its sales process by the leasing company. Features include early termination quotation, accident write-off and disposal tracking.

Vehicles automatically appear in this module when the status in Contract Management) is set to one of the following:

- Early Termination
- Returned/Time expired
- Accident Write Off

The data from Contract Management is used to populate many of the fields within this module, with additional details added when available. Vehicles may also be manually loaded into this module, for disposal on behalf of a third party (Feature), in which case they will have the status of Brokerage Disposal.

Vehicles will reside in the Terminations Module from the point of return until final disposal and will move through a series of Status changes the vehicle progresses through the system. Individual tabs allow you access to all the required elements within the contract. Access is also provided to the Vehicle Schedule to review the contract details.

## Statuses

A status indicates the stage the vehicle has reached within the Terminations process. A change of the code can also act as a 'sign off' from one person/department, indicating that responsibility for this vehicle has now passed to other users. It is possible, in some cases, to revert to a previous status – for example, if a 'Sale' is cancelled.

The status codes allocated to a vehicle on entry into the Terminations Module are as follows:

**Awaiting sale** - Vehicle is waiting to be sold and removed from the system.

**Accident write-off** - Vehicle enters Terminations from Contract Management after being set to Accident Damage Status and being declared a write off by the insurers.

**Brokerage Disposal (Feature)** - Vehicle is loaded manually into the module for the purpose of disposal on behalf of a third party; for example, customers who already own the vehicles themselves may ask for the vehicle to be disposed of on their behalf.

**Early Termination** - Vehicle enters the module after the calculation and acceptance by the customer of an Early Termination quotation.

**Returned Time Expired** - Vehicle will be moved to this status on the normal expiry of the contract.

**Sold** - Vehicle has been sold and is no longer available.

**Terminated** - Vehicle has been sold and the relevant accounting entries for Stage One Cleardown are performed.

**Cleardown** - All accounting entries for Stage Two Cleardown are performed and no further entries can be made against the vehicle.

## Terminating Vehicle Details

The following tabs are available on the Terminating Vehicle Details window: Vehicle, Contract, Funding, Termination, Accident write off, Excess Mileage, Collection, Trade, Disposal, Statistics, Key Dates.

Each of the above Tabs contain information relevant to that part of the disposal process and the relevant information is 'read' from the Contract Management area of the system.

## Special Operations

As with the other operational modules there are a number of tasks which fall outside the 'normal' business activity. In the Terminations Module, these 'Special Operations' include:

Change a Vehicle's Status - Change a vehicle's status, say from 'Awaiting Sale' to 'Returned-Early', or from 'Sold' back to 'Awaiting Sale' if the sale falls through

Change a Vehicle's Reg. No - A vehicle's registration number may need to be changed, for example, if a cherished plate is being discontinued and it needs to be returned to its original plate.

Broker Disposal Reschedule - If required, you can change the broker disposal schedule.

## Terminations Features:

Feature ID		Description
03	Brokerage Disposal	For disposal on behalf of a third party
23	CAP Data	Links to CAP values for comparison purposes
35	GBB Enhancements	Upgraded Guaranteed Buy Back arrangements
