

Do you outsource insurance because it is too much work to handle yourself?

With the *InfoLease* Insurance Management module, you can control this process efficiently – yourself – by automating repetitive tasks and earning a profit in the process.

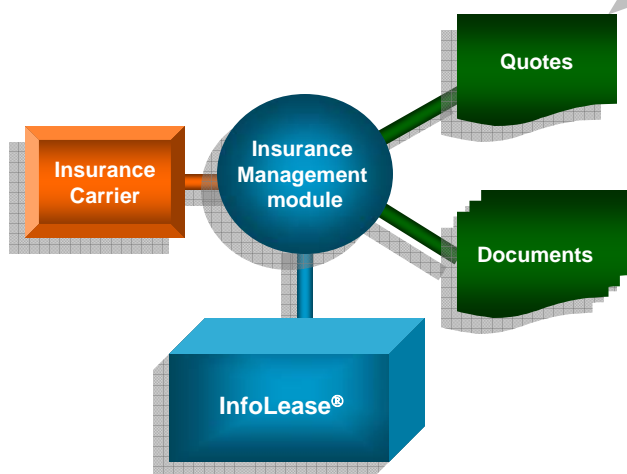

With the savings of time and effort provided by this module, you can handle the details of your insurance program cost-effectively, including:

- Streamlining data entry related to insurance
- Easily tracking contracts that have been automatically enrolled in your insurance program
- Calculating premiums automatically
- Streamlining the process of providing data to the insurance carrier

The *InfoLease* Insurance Management module has already been set up and tested for those who use **Equipment Insurance Services (EIS)** as the insurance provider.

Take advantage of data already stored in *InfoLease* to complete repetitive tasks quickly and accurately, including the ability to generate:

- Insurance quotes for lessees
- Insurance policy documents
- Other letters to the lessee related to insurance, such as confirmation of auto-placement.

INS. QUOTE.00	Insurance Quote Maintenance	XX/XX/XXXX
