The New InfoLease Module - Multiple Meter Reads

Lower the Cost of Handling Evolving Technology

Today, *InfoLease* leads the way in tracking equipment usage, with its Asset Usage Tracking module, capable of storing meter reads, calculating charges, and invoicing charges as needed to support creative, usage-based financings. As technology has advanced, manufacturers have begun to produce equipment in a variety of configurations, and tracking usage has become more complex. If you have ever used a copier that can produce black & white, color, and photo quality images, or leased a vehicle for which the dealer was tracking hours of use, as well as mileage, you are familiar with the nature of this business challenge.

What's new?

Now *InfoLease* offers a solution to handle this additional complexity, efficiently and cost-effectively, with the new Multiple Meter Reads module, additional functionality to supplement Asset Usage Tracking.

Key Functionality

- ◆ Ability to store more than one reading per month per machine, including the ability to track & calculate charges at different rates
- ◆ Standard Asset Usage Tracking reports updated to include data by meter description

InfoLease

Software Requirements

IBM AIX 5.2

HP/UX 11

Sun/Solaris 10

Windows 2003 (SP1)

Client Workstation Requirements

Microsoft Windows 2000-SP4

Single Intel processor at 500 Mhz or greater

128MB of RAM (minimum)

Server

Single Intel processor at 2.0 Ghz or greater or

Single RISC processors at 1.2 Ghz or greater

2 GB of RAM (minimum)

50 GB of disk space
