

PROFINIA™ PORTFOLIO CONTROL SOFTWARE
FROM INTERNATIONAL DECISION SYSTEMS®

Streamline Management and Delivery of Valuable Information on Your Financed Equipment

Increase Your Profits with Automated Asset Tracking

Does your current, contract-based accounting system support your need to share valuable knowledge about the equipment you finance? Could automated tracking of equipment values and locations, tax liabilities, and UCC filings dramatically improve your operating efficiency and profitability?

Provide More Valuable Equipment Information to Your Vendor and Dealer Partners

ProFinia is the complete portfolio management system with a built-in equipment catalog to meet today's demands for more detailed information. Seamless integration with industry-standard enterprise systems and specialized tools ensures you can readily gather and share accurate data, and better leverage that data for business growth.

With ProFinia™, you can easily:

- Create, track, and post general ledger entries for each individual asset, enabling measurement of true Return on Asset (ROA).
- Improve your ability to manage risk by synchronizing your critical data on one powerful system.
- Move assets on and off agreements, and in and out of inventory, while retaining their full income and depreciation histories.
- Increase staff productivity by eliminating reliance on spreadsheets and databases for asset-level data.

- Track residual value and profitability for specific equipment types, allowing you and your partners to price more competitively while better managing exposure and risk.
- Add specialized invoicing capabilities to meet customer needs, including billing by location, cost center, or individual asset.
- Create and share detailed accounting entries with your financial partners.
- Embed your vendor partner's equipment catalog into your system for value-added reporting on current costs and values.

ProFinia

Application Server

BEA WebLogic Server
InfoAnalysis Accounting Engine
