

PROFINIA™ PORTFOLIO CONTROL SOFTWARE
FROM INTERNATIONAL DECISION SYSTEMS®

Streamline Management and Delivery of Valuable Information on Your Financed Equipment

Streamline the Day-to-Day Process of Equipment Management

ProFinia™ is the complete portfolio management system with a built-in equipment catalog to meet today's demands for more streamlined processing of detailed asset information. Seamless integration with industry-standard enterprise systems and specialized tools ensures you can readily gather and share accurate data, and better leverage that data for business growth.

Increase Your Profits with Automated Asset Tracking

Does your current lease accounting system support your need to use valuable knowledge about the equipment you finance? Could automated tracking of equipment values and locations, tax liabilities, and UCC filings dramatically improve your operating efficiency and profitability?

With *ProFinia*, you can easily:

- Store your vendor's equipment catalog information in your system and streamline the process of generating detailed, powerful reports on your portfolio.
- Move assets on and off agreements, and in and out of inventory, while retaining their full income and depreciation histories.
- Add specialized invoicing capabilities to meet customer needs, including billing by location, cost center, or individual asset.
- Create and share detailed accounting entries with your financial partners.
- Store consistent, detailed information about assets in the same system in which the accounting is done, eliminating manual efforts and internal conflicts.
- Simplify your process of setting residual values by providing you with a single, robust database to store equipment information, right down to the make, model, and year of the equipment.
- Track general ledger entries for each individual asset, enabling a measurement of true Return on Asset (ROA), based on asset level data.
- Integrate asset information into all aspects of the business so that everyone in your company has real-time visibility into your latest asset data.

ProFinia
