

**Creekridge Capital Now Running  
*InfoLease*<sup>®</sup> and *Rapport*<sup>®</sup> Software Solutions  
from International Decision Systems, Inc.**

**MINNEAPOLIS, Minn.** (September 26, 2006) – [International Decision Systems](#)<sup>®</sup> is pleased to announce that [Creekridge Capital LLC](#) of Edina, Minnesota, is now running both [InfoLease](#)<sup>®</sup> and [Rapport](#)<sup>®</sup> in its “live” business environment. As part of their bold growth strategy, Creekridge chose *Rapport* to help streamline its origination channel and better support business partners. *Rapport* combined with *InfoLease* is providing robust functionality that is supporting expanded and innovative customer programs.

“This systems infrastructure upgrade provides our organization with the capability to grow our portfolio through the use of automation,” said Gregory E. Larson, president of Creekridge Capital. “The fact that *Rapport* and *InfoLease* are so tightly integrated, together delivering inherent automation played a major role in our selection process.”

Todd Davis, president of International Decision Systems, commented, “To have a new client not only select *Rapport* for origination-through-booking processes, but also choose to replace their existing back-office platform with *InfoLease*, is a clear indication of this combination’s market power. *InfoLease* has been our flagship product for some time, and teaming it or ProFinia or LeaseEnterprise with *Rapport* results in the most robust origination and servicing platform available in the industry today.”

The Professional Services group within International Decision Systems helped Creekridge fully implement *InfoLease* within 60 days of purchase, and completed the *Rapport* phase of implementation 150 days later. Commenting on the efficiency and simplicity of this second phase, Larson said, “The project team was highly knowledgeable about the *Rapport* solution, and they were able to provide effective guidance during the design and configuration phases of the project by applying prior experience with many previous implementations at a variety of lease and loan organizations.”

### **About InfoLease**

*InfoLease* continues as the gold-standard of the equipment finance industry with millions of assets and more than \$500 billion of financed goods dependent on its reliability and dependability. In 2005 alone, more than \$10 billion in additional portfolios were converted to or grown in InfoLease. More than any other equipment finance solution, InfoLease delivers sound leasing operations, rich functionality for loans and robust reporting all scalable to the needs of your organization including regulatory compliance.

### **About *Rapport* Software from International Decision Systems**

Since its 2002 introduction, *Rapport* has been selected by more than 40 prominent equipment finance companies driving toward maximum efficiency in lease/loan origination. The built-in *Rapport Rules*<sup>™</sup> engine makes this software solution powerfully adaptable for companies focused on business transformation through streamlined operations. Easily linked to any portfolio management system, including *LeaseEnterprise*<sup>®</sup>, *InfoLease*<sup>®</sup>, or *ProFinia*<sup>™</sup>, *Rapport* enables extensive real-time information access across the organization, including controlled visibility for dealers, vendors, and other partners.

International Decision Systems delivers *Rapport* with a proven range of essential screens, workflow, business rules, and web service connections for credit evaluation. These pre-configured tools promote rapid adoption and beneficial use of the system, and serve as an excellent base for further developing a fully configured, company-specific solution meeting a wide range of business objectives.
