

RAPPORT® ORIGINATION SOFTWARE
FROM INTERNATIONAL DECISION SYSTEMS®

Gain Full Visibility into Your Pipeline to Increase Business Efficiency and Control

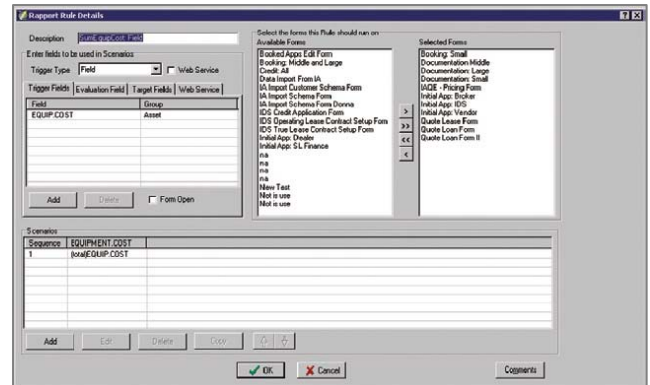

Deliver Real-Time Status Information to All the Right People

How much time does your credit staff spend handling sales and management calls about pending transactions, rather than focusing on sound, efficient decision-making? Would you and your salespeople be more productive if you had continuous online access to accurate, detailed status information?

Now you can control your costs by increasing efficiency throughout your business with:

- An origination system that offers you and your key staff instant access to transaction information they need, on-demand.
- The ability to quickly generate management reports and examine complex transactions from multiple perspectives.
- Fast, reliable online connections to critical online financial and asset information resources.
- The ability to free valuable staff resources from manual tasks and multiple phone interruptions, enabling them to focus on revenue-generating activities.

Automate Your Rules and Policies for More Effective Control

Rapport is the comprehensive front-end solution that synchronizes your operations – and helps ensure the consistent application of your business rules and quality standards. With this system integrated seamlessly to *InfoLease*®, *ProFinia*™, *LeaseEnterprise*®, or another back office system, you ensure full data integrity and transparency.

- Improve overall operating control and simplify compliance by embedding your business rules into your online processing.
- Increase profit and reduce risk by ensuring that higher quality information is available to all decision-makers.
- Expand your ability to readily report on and analyze all transactions.
- Automate your complete origination process, including transfer to your back-office systems, to ensure data integrity.
- Ensure consistent reporting by synchronizing your transaction data with other internal databases.
