

CLOUD-BASED SOLUTION FOR ORIGINATION AND PORTFOLIO MANAGEMENT

THE 100% SaaS ENGINE FOR ASSET FINANCE

PROVEN IN THE PAST. BUILT FOR THE FUTURE.

How the world acquires equipment and other assets is changing and creating lucrative new opportunities for your bank, your brand or your independent lending firm. Fully capitalizing on those emerging opportunities requires an origination and portfolio management solution that offers rock-solid business logic — and the economic and operational advantages of software as a service (SaaS). Only one asset finance platform gives you both proven operational excellence and the freedom, flexibility and economy of SaaS — IDScLOUD™.

END-TO-END ASSET FINANCE

THE ELEMENTS OF IDScLOUD™

Rapport®

From the first interaction with a new customer through quoting, credit decisioning and documentation, Rapport® automates deal flows and provides exceptional data transparency and auditability. The solution is designed to reduce risk, accelerate applications, improve customer service and free your team to focus on growing your business. The software supports all asset classes, contract structures and ticket sizes. This makes it easy to enter new markets, add sales channels, offer alternative financing structures or enable mobile access via pre-built APIs.

InfoLease®

InfoLease® is the world's best-selling solution for portfolio management. It offers standard accounting formulas, calculations and reports that have been perfected through decades of audit scrutiny. InfoLease® supports all contract structures, including tax and non-tax leases, leveraged leases, loans, conditional sales contracts, floating rate and revolving accounts. Key features — such as an open architecture, streamlined access to data and advanced reporting — simplify compliance and help banks, captives and independents of all sizes grow their enterprises.

PAY ONLY FOR WHAT YOU USE

With our true SaaS solution, you only pay for what you actually use. Our single-fee, subscription-based pricing lets you hand-pick features from our industry-leading solutions.

IDScloud™

KEY ADVANTAGES OF IDScloud™

IDScloud™ provides banks, captives and independents with more than just the industry's best-selling origination and portfolio management software. It is a highly flexible platform that allows you to capitalize on current opportunities — and quickly scale up to accommodate your enterprise as your volumes increase or as you move into entirely new markets.

Single product design. Rapport® origination software and InfoLease® portfolio management software are offered as an integrated solution on IDScloud™. Advantages of a single-vendor solution include consistent data representation and lifecycle functionality, a universal user interface, automatic data transfers and a simplified systems landscape.

Integrated QA. IDS ensures integration between the Rapport® and InfoLease® solutions and jointly certifies them through full lifecycle testing as part of every product release.

Modular design. Success in asset finance requires the ability to operate efficiently, together with the agility to respond quickly to new opportunities. A true SaaS solution like IDScloud™ makes it easy to grow your business by doing more of what you already do well, all while giving you the power to quickly enter new markets, launch new products or finance new asset types — with no concern over purchasing additional licenses hardware, software, infrastructure or systems administration.

Broad compatibility. The standards-based design of IDScloud™ allows you to communicate and share data with a wide range of external systems. Empowering users to exchange data directly with other systems improves productivity, reduces errors and results in faster decisioning.

Built-in compliance checks. IDScloud™ includes configurable data validations that run across your entire equipment finance lifecycle. These inherent checks and balances help drive efficiencies, ensure data accuracy and support ongoing compliance requirements. Your decisions are logged and auditable.

WHY MOVE TO THE CLOUD?

Faster time to value. Get your users up and running quickly — and give them immediate access to the best asset finance tools available.

Future proofing. Every new innovation we bring to market is deployed automatically and instantly available to all of your authorized users.

Flexibility. IDScloud™ lets you embrace new markets, products or asset types without acquiring new infrastructure or systems administration.

Disaster recovery. We partner with Amazon Web Services (AWS) so you get the advantage of world-class backup, server redundancy and guaranteed availability.

Pay as you go. There's nothing to install or maintain — simply access our platform and pay for the capacity you use.

Work anywhere. Your team can connect and work from home or anywhere on the road. Plus, users can easily and securely share documents and data.

Security. Our global partnership with AWS means you get the world's most advanced data security technologies and continuous monitoring processes.

Agility. Onboarding employees is fast and easy, no matter where they are. You can also provide authorized users anywhere with instant access to the platform.

About IDS

Leading asset finance enterprises build their businesses on full lifecycle solutions from IDS. Our software streamlines the entire asset finance process, from origination to portfolio management to end-of term. Our new cloud-based offerings integrate seamlessly into any asset finance ecosystem. The scalability, flexibility and economy of our cloud solution makes best-in-class asset finance software accessible to banks, independents and captives of all sizes.
