

POWERFUL, FLEXIBLE PRICING

Accurately quote and analyze the details of your most complex lease and loan originations with the IDScloud pricing microservice. This standalone pricing solution delivers a full suite of advanced pricing functions that fit seamlessly with your existing originations infrastructure.

Simple integrations with any third-party systems via RESTful APIs eliminate the need for data reentry and the expense of additional systems — all while delivering access to price modeling, rate automation and reporting features that will bring speed and accuracy to your approvals.

ADD THE FEATURES YOU WANT WITH THE FLEXIBILITY OF SaaS

You can easily integrate and configure the pricing microservice to interface with any CRM or third-party originations package.

The scalability and flexibility of our true Software-as-a-Service (SaaS) solution let you add the features and capabilities you want, precisely when you want them. This fast flexibility also means you only pay for the features and the capacity you need. As you book more deals and grow your business, you can quickly scale up to accommodate higher volumes, new markets or additional asset classes.

Key Features

MAXIMIZE EXISTING INFRASTRUCTURE

Deploy an advanced pricing solution quickly, without the time and cost of a new, dedicated originations platform.

NO NEED TO REENTER DATA

Fully integrated pricing capabilities eliminate the need to manually price and load deals into your existing platform.

COMPREHENSIVE REPORTING

The IDScloud pricing tool delivers additional access to a wealth of reporting features—including payment scheduling, amortization, casualty/termination schedules, purchase options and return on equity reports.

QUICK, ACCURATE PRICING

Unlock the full power of a modern pricing engine—calculate quotes, streamline data entry and create reports in one simple process.

AUTOMATE MANUAL PROCESSES

Rate cards and residual values are assigned automatically by the IDScloud pricing engine, simplifying table entry and maintenance.

About IDS

IDS secured finance technology powers organizations of all sizes with world-class solutions that seamlessly integrate with complex IT infrastructures. We're creating a best-in-class cloud platform for a full range of secured finance applications, including equipment asset finance, factoring and asset-based lending. Offerings include both true SaaS solutions and managed service options. Our cloud-based offerings combine best-in-class features with the scalability, flexibility and economy of cloud deployments, making it accessible to banks, independents and captives of all sizes with configurations to fit your markets and workflows.
